✦ KEY POINTS WE FOUND

- Assist in the design, development, and maintenance of security policies and procedures.
- Monitor security alerts and events, investigating potential incidents.
- Participate in incident response activities and document incidents.

Be part of this exciting journey and join this friendly team!**Key Responsibilities:**

- **Security governance & policy development**
 - Assist in the design, development, and maintenance of security policies, standards, and procedures aligned with industry frameworks (ISO 27001).
- **Security operations & administration**
 - Monitor security alerts and events using SIEM and other security tools, investigating and escalating potential incidents.

- Perform daily administrative tasks such as user access reviews, firewall and security rule management, and patch compliance tracking.
- **Security Control Implementation**
 - Assist in implementing and maintaining technical security controls. This includes endpoint protection, data leakage prevention (DLP), identity and access management (IAM).
 - Work with infrastructure, application and service delivery teams to embed security best practices into systems and projects.
- **Incident Response & Reporting**
 - Participate in incident response activities, identify, contain, and recover from security breaches.
 - Document incidents, root cause analyses, and recommendations for improvements.
- **Secure Systems Implementation & Vendor Risk Management**
 - Collaborate with project teams during the design and implementation of new systems or solutions to ensure appropriate security controls are integrated from the outset.
 - Conduct security reviews of third-party vendors and partners to assess compliance with internal policies, data protection standards, and industry regulations.
- **Awareness & Training**
 - Support the delivery of cybersecurity awareness training and campaigns.

What you need to succeed

- Familiarity with security frameworks such as NIST, ISO 27001, CIS Controls or similar
- Experience with tools such as SIEM, antivirus/EDR, vulnerability scanners and firewalls
- Basic knowledge of networking, systems administration and cloud security principles
- Solid experience in an IT or Cybersecurity role(s)

What are the benefits

- The opportunity to play the pivotal role in an ISO 27001 implementation
- Hybrid working with free parking at the office
- An outstanding technology landscape due to the inflight current business transformation
- An environment which has been recognised as 'a great place to work' for a number of years consecutively
- A friendly, supportive and down to earth team and environment
